THE PHILOSOPHICAL MAGAZINE

EDITOR
PROFESSOR SIR NEVILL MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD
SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.
SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.
W. H. TAYLOR, M.A., D.Sc.

VOL. VIII.—EIGHTH SERIES

JANUARY—DECEMBER 1963

LONDON:
TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C.4.

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. VIII. Nos. (85-96)

(EIGHTH SERIES)

NUMBER 85—JANUARY

PAGE

X-ray Line Shifts in Deformed Uranium. By B. D. Sharma, R. C. Bharadwaj and K. Tangri, Metallurgy Division, Atomic Energy Establishment, Trombay, Bombay 1

Magnetic Domain Walls in Thin Films of Nickel and Cobalt. By J. Silcox, Cavendish Laboratory, Free School Lane, Cambridge 7

On the Charge Flow During Plastic Deformation in Rocksalt. By F. Rueda, Laboratorium voor Kristalkunde en Studie van Vaste Stoffen, Rozier 6, Ghent, Belgium 29

The Scattering of Long Wavelength Neutrons by Irradiated Beryllium Oxide. By T. M. Sabine, A. W. Pryor and B. S. Hickman, Australian Atomic Energy Commission Research Establishment, Lucas Heights, Sydney, N.S.W., Australia 43

Hexagonal Networks of Linear Imperfections in Single Crystals of Cadmium. By J. C. Crump III and J. W. Mitchell, Department of Physics, University of Virginia 59

Pressure Effect on the Fermi Surfaces of Ag and Cu. By D. Caroline and J. E. Schirber, H. H. Wills Physics Laboratory, University of Bristol, Royal Fort, Bristol 8 71

The Behaviour of Slip Lines on Aluminium Crystals under Reversed Stresses in Tension and Compression. By P. Charsley and N. Thompson, H. H. Wills Physics Laboratory, University of Bristol 77

The One-electron States of Imperfect Crystals. By B. W. Holland, Donnan Laboratories, University of Liverpool 87

Vacancy Contribution to the Specific Heat of Solid Argon. By A. J. E. Foreman and A. B. Lidiard, Theoretical Physics Division, Atomic Energy Research Establishment, Harwell, Didcot, Berks 97

Fatigue of Pure Iron and of Iron Containing a Small Quantity of Carbon after Strain Ageing. By A. Ferro and G. Montalenti, Istituto Elettrotecnico Nazionale G. Ferraris, Torino 105

The Temperature Dependence of the Yield Stress of Polycrystalline Iron. By M. M. Hutchison, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia 121

Many-electron Contribution to the Cohesive Energy in Van der Waals Crystals. By S. Doniach, Physics Department, Queen Mary College, Mile End Road, London, E.1 129

The Structure of Liquid Tin. By K. Furukawa, B. R. Orton, J. Hamor and G. I. Williams, Fulmer Research Institute Ltd., Stoke Poges, Bucks 141

Correspondence :

The Hall Effect in a Liquid Alloy. By N. E. Cusack and P. W. Kendall, Birkbeck College, London, W.C.1 157

Acoustic Amplification in Semiconductors and Metals. By A. B. Pippard, Cavendish Laboratory, Cambridge, England 161

PAGE

Stacking Faults in Zinc Sulphide. By L. T. Chadderton, A. G. Fitzgerald and A. D. Yoffe, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge 167
Reviews of Books 175

NUMBER 86—FEBRUARY

Acoustic Measurements of the Electronic Structure of Zinc and Cadmium. By D. F. Gibbons and L. M. Falicov, Bell Telephone Laboratories, Incorporated, Murray Hill, New Jersey 177
Energy Barriers Controlling Creep Processes in Metals with Special Reference to β-cobalt. By P. Feltham and T. Myers, The University, Leeds 203
Palaeomagnetic Measurements on the Great Dyke, Southern Rhodesia. By A. E. M. Nairn, Physics Department, King's College, Newcastle upon Tyne, 1 213
The Dislocation Density, Flow Stress and Stored Energy in Deformed Polycrystalline Copper. By J. E. Bailey, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 223
Rearrangements of Dislocations in Stainless Steel during Electropolishing. By U. Valdrè and P. B. Hirsch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 237
The Influence of Surface Tarnish on the Stress-corrosion of α-brass. By A. J. Forty and P. Humble, H. H. Wills Physics Laboratory, University of Bristol 247
The Annealing of Thermal Conductivity Changes in Electron-irradiated Graphite. By P. R. Goggin and W. N. Reynolds, Atomic Energy Research Establishment, Harwell, Nr. Didcot, Berks 265
Line Breadth Measurements of Stress and Strain in Plastically Deformed Hexagonal Cobalt. By N. C. Halder, Department of Physics, Indian Institute of Technology, Kharagpur, India 273
Electrical Properties of $AuAl_2$, $AuGa_2$ and $AuIn_2$. By J.-P. Jan and W. B. Pearson, Division of Pure Physics, National Research Council, Ottawa, Canada 279
Bonding in the Refractory Hard-metals. By E. Dempsey, Union Carbide Research Institute, P.O. Box 278, Tarrytown, New York 285
Dislocation Arrays Produced in Germanium by Room-temperature Deformation. By E. N. Pugh and L. E. Samuels, Defence Standards Laboratories, Australian Defence Scientific Service, Sydney, Australia ... 301
The Thermoelectric Anomaly at 35°c in Chromium. By A. R. Edwards, Aeronautical Research Laboratories, Department of Supply, Melbourne 311
On the Calculation of the Temperature Variation of the Coefficient of Thermal Expansion for Materials of Cubic Structure. By J. G. Collins, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney, Australia 323
Correspondence:
Surface Structure of Water and Ice. By R. J. Watts-Tobin, Medical Research Council Laboratory for Molecular Biology, Hills Road, Cambridge 333
Low-temperature Resistivity Behaviour of Molybdenum–Iron, Niobium–Iron and Palladium–Iron Alloys. By B. R. Coles, Physics Department, University of California, La Jolla, U.S.A. 335

PAGE

Structural Disorder in Photolytic Silver. By G. C. Farnell and R. B. Flint, Research Laboratories, Kodak Limited, Wealdstone, Harrow, Middlesex 339

Irradiation and a Nabarro Effect. By D. Mosedale, Dounreay Experimental Reactor Establishment, Dounreay, Caithness..... 341

Measurements of Stacking-fault Probabilities in Bulk Specimens. By H. M. Otte and D. O. Welch, RIAS (Research Institute for Advanced Study), Baltimore, Maryland, and G. F. Bolling, Westinghouse Research Laboratories, Pittsburgh, Pennsylvania.. 345

The Aluminium–Technetium System, The New Phases $TcAl_{12}$, $TcAl_4$ and Tc_2Al_3. By L. M. d'Alte da Veiga, and L. K. Walford, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 349

Experimental Determination of Fermi Surfaces. An Extension to Metallic Compounds and Alloys. By A. Beck, J.-P. Jan, W. B. Pearson and I. M. Templeton, Division of Pure Physics, National Research Council, Ottawa..... 351

Reviews of Books..... 355

NUMBER 87—MARCH

Vapour Growth Patterns of CdTe Crystals. By Iwao Teramoto, Research Laboratory, Matsushita Electronics Corporation, Takatsuki, Osaka, Japan..... 357

Determination of Debye Temperature of α-Iron by X-ray Diffraction. By F. H. Herbstein and Jacques Smuts, National Physical Research Laboratory, Council for Scientific and Industrial Research, Pretoria, South Africa..... 367

Characteristics of Forbush Decreases in Cosmic Ray Intensity Observed Underground. By T. Mathews, Imperial College of Science and Technology, London 387

The Magnetic Moment Distribution in some Transition Metal Alloys. By M. F. Collins and J. B. Forsyth, Atomic Energy Research Establishment, Harwell..... 401

The Field Invariants in a Magneto-electric Medium. By T. H. O'Dell, Department of Electrical Engineering, The University, Bristol..... 411

The Magnetic Susceptibilities of Vanadium-based Solid Solutions Containing Titanium, Manganese, Iron, Cobalt and Nickel. By B. G. Childs, W. E. Gardner and J. Penfold, Atomic Energy Research Establishment, Harwell, Berks..... 419

The Observation of Dislocation Loops in the Sodium Chloride–Barium Chloride Mixed Crystal System. By K. B. Harvey, U.S. National Bureau of Standards..... 435

{012} Loops in Face-centred Cubic Metals. By M. J. Makin and B. Hudson, Metallurgy Division, A.E.R.E., Harwell, Berks..... 447

The Temperature-dependence of Strain-hardening in Polycrystalline Copper. By F. P. Bullen and M. M. Hutchison, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia..... 461

Dislocations in Evaporated Lead Sulphide Films. By J. W. Matthews and K. Isebeck, Department of Physics, University of the Witwatersrand, Johannesburg 469

PAGE

The Loop Size Distribution in Neutron Irradiated Copper. By R. V. Hesketh, Berkeley Nuclear Laboratories, Berkeley, Glos. 487
The Rapid After-effect in Zinc. By L. B. Harris, School of Physics, University of New South Wales, Sydney, Australia 493
The Growth Habits and Surface Structure of Ice Crystals. By B. J. Mason, G. W. Bryant and A. P. Van den Heuvel, Physics Department, Imperial College, London 505
The Motion of a Wire Through Ice. By J. W. Telford and J. S. Turner, C.S.I.R.O. Radiophysics Laboratory, Sydney, Australia 527
Reviews of Books 533
Book Notices 535

NUMBER 88—APRIL

The Magnetoacoustic Effect and the Fermi Surface of Cadmium. By M. R. Daniel and L. Mackinnon, Department of Physics, The University, Leeds 537
The Diffraction Analysis of Vacancy Loops in Quenched Aluminium–1% Magnesium. By B. Hudson and M. J. Makin, Metallurgy Division, A.E.R.E., Harwell, Didcot, Berks. 553
Stage III Recovery in Neutron Irradiated Molybdenum and Niobium. By D. E. Peacock and A. A. Johnson, Metallurgy Department, Imperial College, London, S.W.7. 563
Current–Voltage Characteristics of the Helium Field-ion Microscope. By M. J. Southon and D. G. Brandon, Department of Metallurgy, University of Cambridge 579
Soft X-ray Emission Spectra of Nickel–Copper Alloys. By J. Clift, C. Curry and B. J. Thompson, Department of Physics, The University of Leeds 593
The Optical Absorption of Divalent Chromium in $CrCl_2.4H_2O$ and $CrSO_4.7H_2O$. By W. A. Runciman and R. W. Syme, Physics Department, University of Canterbury, Christchurch, New Zealand 605
Repeated Yielding in Tin Bronze Alloys. By R. Russell, Department of Mining and Metallurgy, University of Queensland 615
The Surfaces of Melt-grown Potassium Bromide Ingots. By R. Illingworth, Department of Electron Physics, The University of Birmingham, Edgbaston, Birmingham 631
Soft X-ray Emission Spectra of Zinc and a Copper–Zinc Alloy. By J. Clift, C. Curry and B. J. Thompson, Department of Physics, The University of Leeds 639
On the Relationship between Resistivity and Thermo-e.m.f. By D. Smart and E. Smart, International Research and Development Co. Ltd., Fossway, Newcastle upon Tyne, 6. 643
Common Epitaxial Feature of Various Thin Film Textures. By Dorothy A. Brine and R. A. Young, Engineering Experiment Station, Georgia Institute of Technology, Atlanta 13, Georgia 651
The Microscopy of Metals in Transmitted Ultra-violet Light. By A. J. Forty, H. H. Wills Physics Laboratory, University of Bristol 663
The Paramagnetism of Mn Dissolved in α and β Brasses. By H. P. Myers and R. Westin, Aktiebolaget Atomenergi, Studsvik, Tystberga, Sweden 669

PAGE

Strain Ageing of Copper–Tin Alpha Solid Solutions. By B. Russell and P. Vela, Department of Mining and Metallurgy, University of Queensland 677

Focused Collision Sequences in Tungsten and Molybdenum. By R. S. Nelson, Metallurgy Division, A.E.R.E., Harwell, Didcot, Berks..... 693

Correspondence:

Note on the Formation of Voids during Creep. By G. W. Greenwood, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos..... 707

The Climb and Glide of Misfit Dislocations. By J. W. Matthews, Department of Physics, University of the Witwatersrand, Johannesburg..... 711

Reviews of Books 715

NUMBER 89—MAY

Strain Ageing in $CdCl_2$-doped Rock Salt. By L. M. Brown and P. L. Pratt, Department of Physical Metallurgy, University of Birmingham... 717

The Optical Properties of Liquid Tellurium. By J. N. Hodgson, Physics Department, The University, Keele, Staffs..... 735

Results of Fourier Analysis and Line Breadth Measurements on Molybdenum Filings. By O. P. Agnihotri, Department of Physics, Indian Institute of Technology, Kharagpur, India..... 741

Tensile Properties of a High-purity Iron from −196°C to 200°C at Two Rates of Strain. By H. Ll. D. Pugh and S. S. Chang, Plasticity Division, Materials Group, National Engineering Laboratory, East Kilbride, Glasgow, and B. E. Hopkins, Metallurgy Division, National Physical Laboratory, Teddington, Middlesex..... 753

On the Kinematical Theory of Diffraction Contrast of Electron Transmission Microscope Images of Perfect and Partial Screw Dislocations. By R. Gevers, Departement Fysika Vaste Stof, Studiecentrum voor Kernenergie, MOL, België..... 769

Concerning Liquid Metal Embrittlement, particularly of Zinc Monocrystals by Mercury. By A. R. C. Westwood and M. H. Kamdar, Research Institute for Advanced Studies, Baltimore, Maryland, U.S.A.... 787

An Investigation of the Ordering of the Phases CoAl and NiAl. By M. J. Cooper, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England..... 805

The Electron Distribution in the Phases CoAl and NiAl. By M. J. Cooper, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 811

The Development of Stress and Surface Temperature During Deposition of Lithium Fluoride Films. By H. Blackburn and D. S. Campbell, The Plessey Co. (U.K.) Ltd., Caswell Research Laboratories, Towcester, Northants, England 823

Elastic Moduli of Single Crystal and Polycrystalline MgO. By Dae-Hyun Chung, Department of Ceramic Research, State University of New York College of Ceramics, Alfred University, Alfred, New York.... 833

Continuous Distribution of Moving Dislocations. By T. Mura, Materials Research Center, Northwestern University, Evanston, Illinois, U.S.A. 843

PAGE

Surface Damage on Abraded Silicon Specimens. By R. Stickler and G. R. Booker, Westinghouse Research Laboratories, Churchill Boro., Pittsburgh 35, Pa., U.S.A. 859

Independent Slip Systems in Crystals. By G. W. Groves and A. Kelly, Department of Metallurgy, University of Cambridge 877

Correspondence:

The de Haas–van Alphen Effect in Caesium. By K. Okumura and I. M. Templeton, Division of Pure Physics, National Research Council, Ottawa, Canada 889

Martensite Transformation in the Fe_3Al Superlattice. By M. J. Marcinkowski and N. Brown, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation Research Center, Monroeville, Pennsylvania 891

Reviews of Books 895

NUMBER 90—JUNE

The Soft X-ray L_{23} Emission Spectrum from Liquid Aluminium. By J. A. Catterall and J. Trotter, National Physical Laboratory, Teddington, Middlesex 897

Transient Creep and Recovery in Graphite. By G. M. Jenkins, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos. 903

Anisotropic Thermoelectric Power of AuSn. By J.-P. Jan and W. B. Pearson, Division of Pure Physics, National Research Council, Ottawa, Ontario, Canada 911

A Field Ion Microscope Study of some Tungsten–Rhenium Alloys. By Brian Ralph and D. G. Brandon, Department of Metallurgy, Cambridge University 919

The Generation of Dislocations in Metals by Low Energy Ion Bombardment. By Piers Bowden and D. G. Brandon, Metallurgy Department, Cambridge University 935

The Effect of Electron Irradiation on the Internal Friction of Copper between 10°K and 80°K. By Jenifer N. Lomer, J. J. Thomson Physical Laboratory, The University of Reading 951

Dislocation Interactions and Dipole Formation. By R. J. Stokes and K. H. Olsen, Honeywell Research Center, Hopkins, Minnesota 957

Interstitial Producing Extended Jogs in Face-centred Cubic Lattices. By J. Weertman, Materials Research Center and Department of Materials Science, The Technological Institute, Northwestern University, Evanston, Illinois, U.S.A. 967

The Viscosity of Liquid Helium 3. By D. S. Betts, D. W. Osborne, B. Welber and J. Wilks, Clarendon Laboratory, Oxford 977

Stress Relaxation and Dynamic Recovery in Cobalt at Low Temperatures. By P. Feltham, The University of Leeds 989

Self-Diffusion in Molybdenum. By J. Askill and D. H. Tomlin, Physics Department, The University, Reading, Berks. 997

The Formation of Photographic Images in Single Crystals of Lead Iodide. By R. I. Dawood and A. J. Forty, H. H. Wills Physics Laboratory, University of Bristol 1003

Crystallographic Surface Features on Tin Ingots. By K. E. Puttick, Davy Faraday Research Laboratory, The Royal Institution, Albemarle Street, London, W.1. 1009

PAGE

Variation of Magnetic Structure with Order in the Ni_3Mn Superlattice. By M. J. Marcinkowski and R. M. Poliak, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania 1023

Two-particle Tunnelling between Superconductors. By C. J. Adkins, Cavendish Laboratory, Cambridge 1051

Correspondence:

Microplasma Breakdown at Stair-rod Dislocations in Silicon. By H. J. Queisser and A. Goetzberger, Shockley Laboratory, Clevite Transistor, Palo Alto, California, U.S.A. 1063

A Hardening Effect Associated with Stage III Recovery in Neutron Irradiated Molybdenum. By A. S. Wronski and A. A. Johnson, Metallurgy Department, Imperial College, London, S.W.7. 1067

Effect of Electron–Electron Scattering on the Electrical and Thermal Conductivity of Metals. By Joachim Appel, John Jay Hopkins Laboratory for Pure and Applied Science, General Atomic Division of General Dynamics Corporation, San Diego, California 1071

NUMBER 91—JULY

{11$\bar{2}$1} Twinning. By A. G. Crocker, Physics Department, Battersea College of Technology, London, S.W.11 1077

Diffraction Contrast from Spherically Symmetrical Coherency Strains. By M. F. Ashby, Department of Metallurgy, University of Cambridge, and L. M. Brown, Cavendish Laboratory, University of Cambridge 1083

The Effect of Quenching History, Quenching Temperature and Trace Impurities on Vacancy Clusters in Aluminium and Gold. By R. M. J. Cotterill and R. L. Segall, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 1105

The Work-hardening Characteristics of Cu and α-brass Single Crystals between 4·2 and 500°K. By T. E. Mitchell and P. R. Thornton, Cavendish Laboratory, Cambridge 1127

On the Investigation of Pure X-ray Diffraction Line Breadths in Deformed Copper. By O. P. Agnihotri and G. B. Mitra, Department of Physics, Indian Institute of Technology, Kharagpur, India 1161

Electron Transfer in the Formation of Organic Molecular Complexes. By Joseph J. Weiss, King's College, University of Durham, Newcastle upon Tyne 1169

An Electron-microscope Investigation of a Moonstone. By S. G. Fleet, Department of Mineralogy and Petrology, University of Cambridge, and P. H. Ribbe, Crystallographic Laboratory, Cavendish Laboratory, University of Cambridge 1179

The Formation of Defect Clusters in Aluminium by Ion Bombardment. By C. J. Beevers, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos., and R. S. Nelson, Atomic Energy Research Establishment, Harwell, Berks. 1189

On the Density of Polyethylene Single Crystals. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Bristol 8, England 1203

Elastic Relaxation at a Vacancy in Solid Argon. By A. J. E. Foreman, Theoretical Physics Division, Atomic Energy Research Establishment, Harwell, Berks. 1211

PAGE

The Distribution of Dislocations in Stacked Linear Arrays. By N. Louat, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania 1219

Interpretation of the Thermomagnetic Effects in Bismuth–Antimony Alloys. By H. J. Goldsmid, The General Electric Company Limited, Central Research Laboratories, Hirst Research Centre, Wembley, England 1225

Decomposition of Calcium Fluoride and Strontium Fluoride in the Electron Microscope. By T. Evans, J. J. Thomson Physical Laboratory, University of Reading, Berkshire 1235

The Phase Diagrams of the Aluminium–Rhenium and Aluminium–Technetium Systems. By L. M. d'Alte da Veiga, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England..... 1241

Correspondence:

Ultrasonic Vibration and the Growth of Crystals. By G. Bradfield National Physical Laboratory, Teddington, Middlesex..... 1247

On the Difference between the Amplification of Longitudinal Plasma Waves and the Negative Absorption of Čerenkov Radiation in an Electron Stream. By R. Q. Twiss, Oxford and Cambridge Club, 71 Pall Mall, London, S.W.1. 1249

Reviews of Books 1253

NUMBER 92—AUGUST

Impurity Precipitates in Magnesium Oxide. By D. H. Bowen and F. J. P. Clarke, Metallurgy Division, A.E.R.E., Harwell, Berks..... 1257

Diffusion in Titanium and Titanium–Niobium Alloys. By G. B. Gibbs, D. Graham and D. H. Tomlin, Physics Department, The University, Reading, Berks..... 1269

A Mechanism for the Formation of Twins in Evaporated Face-centred Cubic Metal Films. By J. W. Matthews and D. L. Allinson, Department of Physics, University of the Witwatersrand, Johannesburg..... 1283

Contribution of Three-body Interactions to the Energy of Vacancy Formation in Solid Argon. By L. Jansen, Battelle Memorial Institute, International Division, Geneva, Switzerland..... 1305

The Strain Rate Dependence of the Flow Stress in Neutron Irradiated Copper Single Crystals. By T. J. Koppenaal, Metallurgy Division, Argonne National Laboratory, Argonne, Illinois, U.S.A..... 1313

A Transient Irradiation Creep in Non-fissile Metals. By R. V. Hesketh, Berkeley Nuclear Laboratories, Berkeley, Glos 1321

The Origin of Dislocations during Crystal Growth. By Norman Albon, Battelle Memorial Institute, Columbus, Ohio..... 1335

Crystallography of Dislocation Networks in Annealed Iron. By S. M. Ohr and D. N. Beshers, Henry Krumb School of Mines, Columbia University, New York 1343

Measurements of the Remanent Magnetization of some Individual Magnetic Particles Near the Single-domain Size. By F. R. Muirhead, Department of Physics, The University, Sheffield..... 1361

The Sign of Charged Dislocations in NaCl. By R. W. Davidge, Laboratorium voor Kristallografie en Studie van Vaste Stoffen, Rozier, 6, Ghent, Belgium..... 1369

PAGE

Diffusion in Evaporated Films of Gold–Lead. By C. Weaver and L. C. Brown, Department of Natural Philosophy, The Royal College of Science and Technology, Glasgow 1379

Magnetic Domain Structure in Thin Crystals of Cobalt. By J. Silcox, Cavendish Laboratory, Cambridge, and Department of Engineering Physics and Materials Science, Cornell University, Ithaca, N.Y., U.S.A. .. 1395

The Temperature Dependence of the Resistivity of Liquid Alkali Metals at Constant Volume. By Hirohisa Endo, Division of Pure Physics, National Research Council of Canada, Ottawa, Canada 1403

Enhanced Pre-precipitation Rate in Al–Zn 10% Alloy by Plastic Deformation at 78°K. By T. Federighi and S. Ceresara, Istituto Sperimentale dei Metalli Leggeri, C.P. 129, Novara, Italy 1417

Correspondence :

Surface Structure of Water and Ice—A Reply and a Correction. By N. H. Fletcher, Department of Physics, the University of New England, Armidale, N.S.W., Australia 1425

Fracture Mechanism of Single Crystals of Silicon. By W. D. Sylwestrowicz and Miss S. E. Koonce, Bell Telephone Laboratories Incorporated, Murray Hill, New Jersey 1427

On the Determination of the Energy per Cell in a Diatomic Crystal Lattice. By C. M. Kachhawa and S. C. Saxena, Physics Department, Rajasthan University, Jaipur, India 1429

Reviews of Books 1433

NUMBER 93—SEPTEMBER

Neutron Damage in MgO. By G. W. Groves and A. Kelly, Department of Metallurgy, University of Cambridge 1437

Effect of Vacancy Clusters on Yielding and Strain Hardening of Copper. By J. Galligan, Department of Metallurgy, Columbia University, New York City, New York, and J. Washburn, Department of Mineral Technology and Inorganic Materials Research Division, Lawrence Radiation Laboratory, University of California, Berkeley 1455

$\frac{1}{2}\langle 111 \rangle$ Screw Dislocations and the Nucleation of $\{112\}\ \langle 111 \rangle$ Twins in the B.C.C. Lattice. By A. W. Sleeswyk, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Internationale Research Maatschappij N.V.) 1467

The Theory of the Electronic Structure of Liquid Metals. By P. Phariseau and J. M. Ziman, Cavendish Laboratory, University of Cambridge 1487

Linear Compounds of Dislocations in Silver Chloride with Cupric Ions. By A. S. Parasnis, Department of Physics, Indian Institute of Technology, Kanpur, India, F. C. Frank, H. H. Wills Physics Laboratory, University of Bristol, Bristol, Great Britain, and J. W. Mitchell, Department of Physics, University of Virginia, Charlottesville, Va., U.S.A. 1503

Variations in Orientations of Etch Pits on Graphite Surfaces. By J. M. Thomas, E. E. Glenda Hughes and B. R. Williams, Department of Chemistry, University College of North Wales, Bangor 1513

The Deformation of Graphite Crystals and the Production of the Rhombohedral Form. By E. J. Freise and A. Kelly, Department of Metallurgy, University of Cambridge 1519

PAGE

The Resistivity and Thermoelectric Power of Liquid Gallium and Mercury at Constant Volume. By C. C. Bradley, Basic Physics Division, National Physical Laboratory, Teddington, Middlesex..... 1535

Effects of Preferred Orientation on the Grain Size Dependence of Yield Strength in Metals. By D. V. Wilson and J. A. Chapman, Department of Industrial Metallurgy, University of Birmingham 1543

Hydrogen Penetration in Water-accelerated Fatigue of Rolling Surfaces. By L. Grunberg, D. T. Jamieson and D. Scott, National Engineering Laboratory, East Kilbride..... 1553

Time-dependent Solutions of Transport Equations. By A. M. Guénault and D. K. C. MacDonald, Division of Pure Physics, National Research Council, Ottawa 2, Canada..... 1569

Self-diffusion in Iron. By D. Graham and D. H. Tomlin, Department of Physics, The University, Reading, Berks. 1581

Correspondence :

Promoted Field Desorption and the Visibility of Adsorbed Atoms in the Ion Microscope. By Gert Ehrlich and F. G. Hudda, General Electric Research Laboratory, Schenectady, New York 1587

Vapour Growth of Cadmium Telluride Crystals in the ⟨111⟩ Polar Directions. By Iwao Teramoto and Morio Inoue, Research Laboratory, Matsushita Electronics Corporation, Takatsuki, Osaka, Japan..... 1593

Vacuum Evaporated Silicon Layers Free from Stacking Faults. By G. R. Booker, Cavendish Laboratory, University of Cambridge, Cambridge, England, and B. A. Unvala, Engineering Laboratory, University of Cambridge, Cambridge, England..... 1597

Independent Slip Systems in CsCl-type Crystals. By S. M. Copley, Ceramic Laboratories, Department of Mineral Technology, and Inorganic Materials Research Division, Lawrence Radiation Laboratory, University of California, Berkeley, California..... 1599

Variation of Electrical Resistance of Sodium Nitrate with Temperature. By S. Srinivasan, Indian Institute of Technology, Madras 36, India..... 1601

Reviews of Books..... 1603

NUMBER 94—OCTOBER

Electron Microscopy and Diffraction of Twinned Structures in Evaporated Films of Gold. By D. W. Pashley and M. J. Stowell, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 1605

Glide Band Formation and Broadening in Ionic Single Crystals. By S. Mendelson, Semiconductor Research Department, Sprague Electric Company, North Adams, Massachusetts..... 1633

On Diffraction Contrast from Inclusions. By M. F. Ashby, Department of Metallurgy, University of Cambridge, and L. M. Brown, Cavendish Laboratory, University of Cambridge, Cambridge..... 1649

The Penetration of Energetic Ions Through the Open Channels in a Crystal Lattice. By R. S. Nelson and M. W. Thompson, Metallurgy Division, A.E.R.E., Harwell, Berkshire, England..... 1677

The Fragmentation of Heavy Cosmic Ray Nuclei in Light Elements. By M. W. Friedlander, K. A. Neelakantan and S. Tokunaga, Washington University, St. Louis, U.S.A., and G. R. Stevenson and C. J. Waddington, H. H. Wills Physics Laboratory, University of Bristol, U.K..... 1691

PAGE

Observations on Prismatic and Grown-in Dislocations in Zone-melted Molybdenum. By A. Lawley and H. L. Gaigher, The Franklin Institute Laboratories, Philadelphia 3, Pennsylvania 1713

The Annealing of Dislocation Loops in Neutron Irradiated Copper. By M. J. Makin and S. A. Manthorpe, Metallurgy Division, A.E.R.E., Harwell, Berks. 1725

Some New Habit Features in Crystals of Long Chain Compounds. Part III. Direct Observations on Unflattened Monolayer Polyethylene Crystals. By D. C. Bassett, F. C. Frank and A. Keller, University of Bristol, H. H. Wills Physics Laboratory, Royal Fort, Bristol 8, England 1739

Some New Habit Features in Crystals of Long Chain Compounds. Part IV. The Fold Surface Geometry of Monolayer Polyethylene Crystals and its Relevance to Fold Packing and Crystal Growth. By D. C. Bassett, F. C. Frank and A. Keller, University of Bristol, H. H. Wills Physics Laboratory, Royal Fort, Bristol 8, England 1753

Correspondence:

On the Brownian Movement of Unrestrained Systems. By A. M. Guénault and D. K. C. MacDonald, Division of Pure Physics, National Research Council, Ottawa, Canada 1789

NUMBER 95—NOVEMBER

Crystalloluminescence and the Nature of the Critical Nucleus. By V. A. Garten and R. B. Head, Division of Physical Chemistry, C.S.I.R.O., Chemical Research Laboratories, Melbourne 1793

The Excitation of Collective States by Inelastic Scattering. The Extended Optical Model. By B. Buck, Oak Ridge National Laboratory, Tennessee, U.S.A., and A. P. Stamp and P. E. Hodgson, Nuclear Physics Laboratory, Oxford 1805

Work Hardening in Ordered Alloys with Special Reference to β-phase AgMg Alloys. By J. C. Terry and R. E. Smallman, Department of Physical Metallurgy, University of Birmingham 1827

Quenching-in and Annealing-out of Point Defects in Degassed Gold held in Clean and Dirty Atmospheres. By D. Jeannotte and E. S. Machlin, Henry Krumb School of Mines, Columbia University, New York 27, New York 1835

The Fatigue of Zinc Single Crystals. By T. Broom, Materials Division, Central Electricity Research Laboratories, Leatherhead, Surrey, and J. M. Summerton, International Nickel Co. (Mond) Ltd., Development and Research Department, Birmingham 1847

The Slip Plane of Crystalline Mercury. By A. G. Crocker, F. Heckscher and M. Bevis, Department of Physics, Battersea College of Technology, London, S.W.11 1863

Stress–Strain and Contraction Ratio Curves for Polycrystalline Steel. By P. S. Theocaris and E. Koroneos, Laboratory for Testing Materials, Athens National Technical University 1871

Work-hardening in Niobium Single Crystals. By T. E. Mitchell, R. A. Foxall and P. B. Hirsch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 1885

Direct Observations of the Geometry of Defects in Germanium. By D. B. Holt and A. E. Dangor, C.S.I.R. Solid State Physics Research Unit, University of the Witwatersrand, Johannesburg, South Africa 1921

PAGE

An Experimental Determination of the Electrical Resistivity of Dislocations in Aluminium. By R. M. J. Cotterill, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England..... 1937

Initial Stages of Damage in High Stress Fatigue in some Pure Metals. By C. Laird and G. C. Smith, Department of Metallurgy, University of Cambridge, Pembroke Street, Cambridge..... 1945

Correspondence :

Elastic Constants of Polycrystalline MgO. By Robert Lowrie, Union Carbide Research Institute, P.O. Box 278, Tarrytown, New York..... 1965

Comment on ' Cross-slip and Fatigue in Metals at Low Temperatures '. By C. E. Feltner, Department of Theoretical and Applied Mechanics, University of Illinois, Urbana, Illinois..... 1967

The Paramagnetism of Small Amounts of Mn Dissolved in Cu–Al and Cu–Ge Alloys. By H. P. Myers and R. Westin, Aktiebolaget Atomenergi, Studsvik, Nykoping, Sweden..... 1969

On the Gradient Column Method for Measuring Densities ; with Particular Reference to its Application to Polymer Single Crystals. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Royal Fort, Bristol 8, England..... 1973

Ordering Effects in the Alloy Au_3Mn. By D. P. Morris, J. L. Hughes and G. Davies, Physics Department, University College of North Wales, Bangor..... 1977

The Nature of Deformation Stacking Faults in F.C.C. Alloys. By A. Howie, Cavendish Laboratory Cambridge, and U. Valdrè, Istituto di Fisica, Bologna, Italy..... 1981

Elastic Anisotropy in Cold-worked and Annealed Hexagonal Cobalt. By N. C. Halder and G. B. Mitra, Department of Physics, Indian Institute of Technology, Kharagpur, India..... 1985

NUMBER 96—DECEMBER

The Electrical Resistivity of Dislocations. By Z. S. Basinski, J. S. Dugdale and A. Howie, Division of Pure Physics, National Research Council, Ottawa, Canada..... 1989

Use of the Bright Field Shadow Technique to Study Superconductivity in the Electron Microscope. By M. J. Goringe and U. Valdrè, Crystallographic Laboratory, Cavendish Laboratory, Cambridge..... 1999

Heats of Solution in the Noble Metal Solvents. By T. Pyle, Lanchester College of Technology, Coventry..... 2005

Some Observations on the Mechanical Properties of a ζ H.C.P. Copper–Germanium Phase. By P. H. Thornton, Mellon Institute, Pittsburgh 13, Pennsylvania, U.S.A..... 2013

The Effect of Platelet Precipitates on the Structure of Lead Sulphide Films. By A. D. Wilson and R. C. Newman, Associated Electrical Industries, Research Laboratory, Rugby, and R. Bullough, Associated Electrical Industries, Research Laboratory, Aldermaston..... 2035

Radial Flow of Superfluid Helium Over a Horizontal Plate. By P. W. F. Gribbon and J. A. Cope, School of Natural Philosophy, St. Salvator's College, St. Andrews University, Scotland..... 2047

The Fermi Surface of Aluminium. By N. W. Ashcroft, Cavendish Laboratory, University of Cambridge..... 2055

PAGE

Correspondence:

On Diffraction Contrast at Particle Tracks in Crystals. By Lewis T. Chadderton, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge 2085

The Damage of Crystals by Collimated Fission Fragments. By F. P. Bowden and P. E. Caspar, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge 2091

Effects on Neutron Irradiation on the Yield Strength and Grain Size Relationship in Iron and Iron–Carbon Alloys. By J. G. Y. Chow and S. B. McRickard, Brookhaven National Laboratory, Upton, New York 2097

The Magnetostriction of Polycrystalline Cobalt. By L. Alberts and H. L. Alberts, Physics Department, University of the Orange Free State, Bloemfontein, Republic of South Africa 2101

Stacking Faults in Thin Foils of Zone-melted Iron. By T. Takeyama and E. J. Koepel, Michigan College of Mining and Technology, Department of Metallurgical Engineering, Houghton, Michigan 2103

Anisotropic Crack Growth in Compressed LiF. By Sheldon M. Wiederhorn, Research Engineer, Engineering Research Laboratory, Engineering Department, E. I. du Pont de Nemours & Co., Inc., Wilmington, Delaware 2109

Crack Nucleation in Magnesium Oxide Bi-crystals. By H. N. Sinha, Baillieu Laboratory, Metallurgy Department, University of Melbourne, Australia 2115

An Attempt to Observe the Basal Plane Anisotropy of Hematite. By Subir K. Banerjee, Department of Geodesy and Geophysics, University of Cambridge 2119

Dislocation Debris in Aluminium Fatigued at 78°K. By C. E. Feltner, Department of Theoretical and Applied Mechanics, University of Illinois, Urbana, Illinois 2121
